

Dataset Information, Fields, and Codes

General Dataset Specifications

Synopsis

These datasets are made available at no cost due to overwhelming interest in data-centric reports. The data is extracted into tab-delimited text files.

Data Viewing and Download

Upon clicking the 'Download' link to the right you will be prompted to save the file to your local storage.

Dates and Run Times

All datasets are produced on a daily basis to ensure that the data presented is always the most current available. The date appearing to the left of the filename is the date that the report was produced. We strive to produce the datasets daily at approximately 5:00am; however, the timing and availability of some or all datasets may fluctuate due to system maintenance or other factors.

Field Definitions and Code Values

Field names are defined in the spreadsheet entitled "Fields_Codes". Field names are consistent across datasets.

Much of the data is code-driven and will require reference tables in order to interpret the meaning of the codes. Where practical, code literals are presented in the datasets along with the code values; however, at times the code literals are omitted due to space limitations or usability concerns. In such cases, the applicable reference tables are also available in the spreadsheet. Code table dependencies are also listed in the dataset definitions below.
